About

I am a software developer with over 5+ years of hands-on experience specializing in **Ruby, Ruby on Rails, ReactJS**, and **Angular**. I have a strong track record of building scalable, high-performance applications in both front-end and back-end environments. With a deep understanding of modern web frameworks and cloud infrastructure, I am proficient in delivering efficient, maintainable solutions. As an **immediate joiner**, I am ready to bring my expertise in Agile methodologies and best practices to new challenges and contribute to impactful projects.

Technical Skills

Programming Languages(Backend): Ruby, Python

Frontend: HTML, CSS, Bootstrap, JavaScript, JQuery, ReactJS, AngularJS, Angular(4/5/6/7), Typescript, Tailwind CSS

Web Frameworks: Ruby On Rails(ROR), Django, GraphQL

Databases: MySQL, Postgres, SQLite

Infrastructure and middleware: AWS(EC2, RDS, S3), Digital Ocean, Heroku, C9, GCP, Docker, Redis, Sidekiq

Version Control System: Github, Gitlab, Bitbucket

Monitoring: Datadog, Rollbar, New Relic, Sentry

CI/CD: CircleCI, ArgoCD, GitHub Actions

Work Experience

Persistent Systems / Project Lead

Dec 2024 - Feb 2025, Hybrid

Work Experience Summary:

As a Project Lead oversees the application's progress by discussing and resolving ongoing issues with the team. They coordinate debugging efforts, identify root causes, and ensure timely fixes. Additionally, they manage planning and development of new features based on requirements.

Project Details:

1. Solar Winds SSD

Overview: SolarWinds is an IT Service Management (ITSM) tool designed to streamline the ticketing process for organizational issues. It helps manage incidents, service requests, and problem resolutions efficiently. Teams use it to track, prioritize, and resolve IT-related tasks while ensuring minimal downtime. The platform supports automation, reporting, and collaboration to enhance service delivery.

Technologies: Ruby 3.0, Rails 6.1.0, React 16, Redis, Rescue, Elastic Search, Node JS. MySQL, PsqI

LTIMindtree / Specialist - Software Engineering

Jul 2024 - Dec 2024. Hybrid

Work Experience Summary:

I have experience in understanding task requirements and designing effective solutions. I followed the CI/CD process for seamless deployments and conducted functional testing using RSpec to ensure application reliability. Additionally, I am responsible for resolving ongoing application issues, maintaining stability, and enhancing performance.

Project Details:

1. Capture(MSCI)

Overview: MSCI's capture focuses on the Environmental, Social, and Governance (ESG) issues of various organizations. It assists investors in making informed decisions about becoming a PRI (Principles for Responsible Investment) signatory, based on the ratings provided by the organization's reviewers.

Technologies: oracle server, JRuby, capistrano, Javascript, Azure, azure storage blob, rspec, sinatra

Bacancy Technology / Sr. ROR Developer

Mar 2021 - Jun-2024. Remote

Work Experience Summary:

Collaborated with cross-functional teams and conducted code reviews to ensure high-quality development and mentorship. Developed and tested robust code using RSpec, ensuring reliability through test-driven development. Managed deployments with CI/CD pipelines and translated stakeholder requirements into scalable technical solutions.

Projects Details:

1. StackShare (<https://stackshare.io/>)

Overview: The stackshare is the platform built in rails and react. It is basically useful for the devs, CTO/ Managers. Stackshre enterprise is the technology system of record for large engineering organizations who are running many complex tech stacks. It basically provides the visual representation of the tools used in the different providers(ex., github, Bitbucket, Gitlab, Azure). It helps the dev/team/ cto to take a right decision to use the tech stack for building any application.

Technologies: Ruby 2.7.1, Rails 7.0.2, rspec, reactjs, Google cloud, algoliasearch-rails, github, azure, bitbucket, sidekiq, mysql, graphql, reactjs

2. Dissolve (<https://dissolve.com/>)

Overview: The dissolve is the platform built in rails and react. It is basically useful for the photographer and video makers. The user can stock the collection of images/ videos. The dissolve license stock video and images for use in commercials, television shows, documentaries, feature films, design, and creative work.

Technologies: Ruby 2+, Rails 5+, spreecommerce, rspec, reactjs, AWS, Jenkins, digital ocean, sidekiq, pg

Family Business(Construction)

OCT 2016 - Dec 2021. Nagpur

Education

GHRIIT(RTMNU) / MCA(Master Of Computer Application)

JUL 2014 - MAY 2016, Nagpur

CPC(RTMNU) / BCA(Bachelor Of Computer Application)

JUL 2011 - MAY 2014, Nagpur

YPHSC / HSC

JUL 2010 - APR 2011, Nagpur

KBAHS / SSC

JUL 2008 - APR 2009, Nagpur

Certificate Details

ITzen certificate in Computer Software.

Participation certificate of University level Paper Presentation.

Participation certificate of National level Paper Presentation.

Attending JAVA programming seminar certificate.

Participation certificate of Code Competition organized by Persistent Pvt. Ltd.

I hereby declare that the above-mentioned information is correct to the best of my knowledge and belief.
