6.) Ebsco(IR)

Team Size: 2

Overview: Arkivum is providing Ebsco with a software solution that integrates an Institutional Repository (IR) with digital preservation and data safeguarding. The IR will be based on the Hyku version of Samvera. The digital preservation and data safeguarding component will use Arkivum's V5 product.

Technologies: Ruby-2.5.1, Rails-5.1.1, Solr-7.5.0, Fedora, Sidekiq, Redis, Postgres(Psql), Devise, RSpec

7.) Kinetizine

Team Size: 1

Overview: Turn annoying PDFs into trackable, engaging, web docs, & microsites for ultimate control over your content while revealing your best prospects.

Technologies: Ruby-2.5.1, Rails-5.0.0, AngularJs, DelayJob, JQuery, MySQL, Imagemagic, Capistrano, Rspec, Capibara

8.)

Overview:

1000Farmacie is the union of the best Italian pharmacies that work daily in contact with the public.

We have decided to join and put our warehouses at your disposal, to create a common one where you can always find the product you are looking for at the best price, taking advantage of the availability and discounts that pharmacies offer.

On 1000farmacie.it you will find only products authorized for online sale and with the CE guarantee mark, for this reason we guarantee you maximum seriousness and reliability.

Our mission is to make our customers satisfied. 1000Farmacie was created to offer the three things everyone needs:

Choice : find all the products you want and need;

Control : you choose the pharmacy from which to order according to your needs;

Speed : receive the products directly to your home in the shortest possible time.

Technologies: Ruby-2.3.8, Rails-4.1, DelayJob, Sidekiq, JQuery, MySql, Capistrano, Rspec, Tookan, Stamped.io
